

# Reap the benefits of Opargo in just five simple steps!

**Step 1. We digitally extract and analyze your historical data.**  
(one to two days, all work handled by us behind the scenes)

*To optimize the future, we must first understand the past.*

**Step 2. We listen, learn, and capture those unique things about your practice.**  
(Usually one or two 90-minute sessions)

*Each practice is different.*

**Step 3. We program Opargo to optimize your practice goals such as revenue growth, referral priority, full schedule, compliancy, and more.**  
(two days to two weeks depending upon complexity of your practice)

*We align your goals with your schedule to give you greater control of your practice.*

**Step 4. We get together to double check that what we've captured and programmed is correct.**  
(Typically takes two hours)

*You verify our work.*

**Step 5. Training & Go Live**  
(Typically takes two hours)

*Scheduling in Opargo is as easy as booking a flight online.*

**A typical install takes two to three weeks...and very little of your time!**
